PRODUCTION OF MACHINES FOR BALLOON PRINTING

We offer full-automatic machines for many variations of balloon printing
All types of machines which you need for printing of balloons

Printing machines:

1. Vertical silkscreen MZ 1colour/2sides

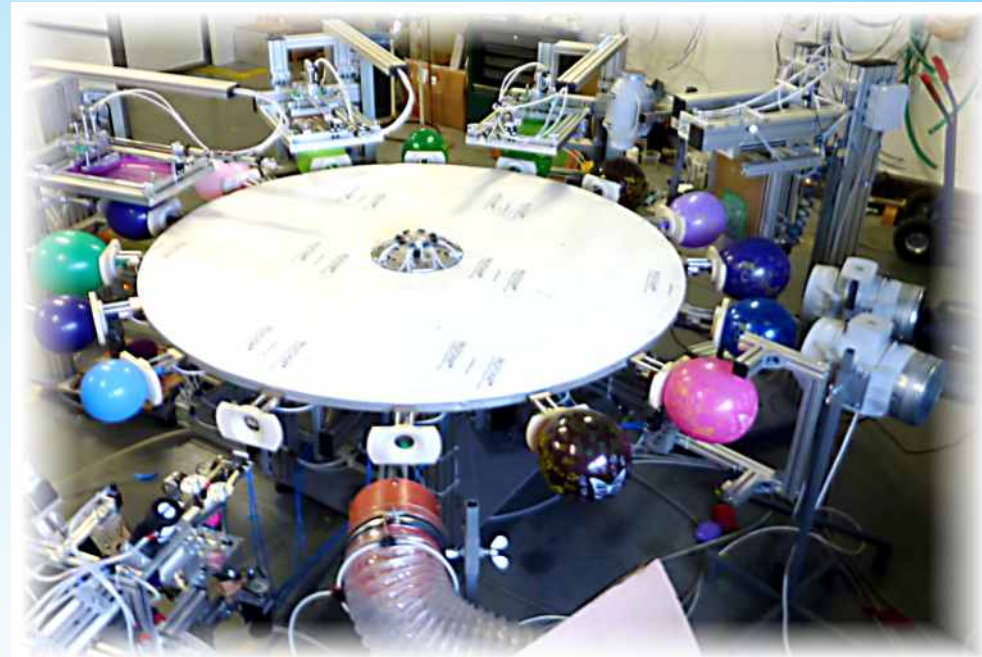

Machine has 16 positions for balloon and allows balloon printing from one side or both sides simultaneously. Using function of 90° turn you can achieve 4 sides balloon printing with one colour. And with 180° turn of balloon is possible print identical two-tone logo on one or both sides.

2. Horizontal silkscreen MZ 2-3-4 colours/2sides+TOP

This type has 16 positions for balloon.

With this machine you can choose from many variations how it works. It is because this type of machine can separately but also simultaneously works with all (7/8) printing heads. For example: 1colour on all 5 sides, 1-4 colours on 1st or at the same time also on 2nd side...

3. Superprint CMYK 8 colours

This machine offers possibility of 1 side printing with decomposition of colours in CMYK or solo 8 colours.

You can also use additional variant which offers simultaneously printing of 1colour on second side of balloon.
